Dengie Marshes Wind Farm

Stage One Consultation

The team at Dengie Marshes Wind Farm have identified an opportunity for a new renewable energy project, known as Dengie Marshes Wind Farm. We are currently exploring a developable area on the Dengie Peninsula, located between the existing wind farms and the coast.

This feedback form is for the stage one consultation on the project. We will be having two consultation stages before we submit the planning application, and welcome views at all stages of the project on how we can improve.

Your views are important to us, and we want to ensure that the project and community benefit fund reflects what is most important to the local community. This includes addressing concerns and taking on board feedback where possible.

Please return your feedback form at our public event, or via our email or postal address by:
